

Explore Hokkaido Website - README

Introduction

Explore Hokkaido is a travel blog website dedicated to showcasing the best experiences, destinations, and cultural highlights of Hokkaido, Japan. The website features different sections including home, about, and contact pages, providing users with detailed information, images, and insights into Hokkaido's most iconic destinations and travel tips.

Features

- Home page showcasing featured destinations with images and descriptions
- About page explaining the mission and purpose of Explore Hokkaido
- Contact page with a form to allow users to reach out
- Responsive burger menu for navigation on mobile devices
- Fullscreen preview feature for images on the homepage
- Image overlays for detailed descriptions of destinations
- Social media links in the footer for Facebook, Twitter, and Instagram

Technologies Used

- HTML5: Structure of the website
- CSS3: Styling and layout of the website
- JavaScript: Interactivity and dynamic features like the burger menu, image preview, and overlay
- Font Awesome: Icons used for social media links and navigation
- External CSS: The website uses external stylesheets to handle responsive design
- External JS: External JavaScript file for handling website behavior like form submission and image preview

Instructions for Running Locally

1. Download or clone the repository to your local machine.
2. Ensure that you have all necessary files (HTML, CSS, JavaScript, images) in the correct directories.
3. Open the 'index.html' file in any modern web browser (Google Chrome, Firefox, etc.).
4. For local development or making changes, you can modify the files in the 'CSS', 'Javascript', and 'Images' folders.
5. To view the website locally, simply double-click on any HTML file or use a local server to run the project.
6. Ensure that all links to external resources like images and stylesheets are correctly referenced in your local setup.
